Hosted Exchange 2010

More email flexibility. Less server hassle and cost.

Hosted Exchange is more than just email, it's a powerful collaboration tool. You can manage contacts, calendars, tasks and email whether you are at your desk or on the go.

Because it's hosted in the cloud, you lose the pain of managing servers and gain the benefits of backups and data security. Hosted Exchange for your business increases staff productivity and drives costs down.

- Add/remove mailboxes at any time to suit your needs
- Unlimited web traffic
- Choice of Premium or Basic mailboxes
- FREE 250MB of SharePoint with first mailbox purchase

Mail, contacts, calendars and files. Shared.

Mobile access

Don't be tied to your desk. ActiveSync for iPhone, Windows devices and Android lets you send and receive email, access appointments and collaborate with staff when you're on the go.

Desktop access

Microsoft Outlook and Exchange are the perfect match. Unlock all the features and functionality of Outlook with Hosted Exchange.

Web access

Login from anywhere to the secure Outlook Web App and manage your email, calendar and tasks. Plus, get instant updates to the desktop and mobile devices.

Hosted Exchange benefits

You control the number of mailboxes and configuration

Tailor your mailboxes to suit individual staff needs. Instantly create, remove and upgrade mailboxes at any time using the simple online control panel. As your business changes, don't waste money paying for extra mailboxes or upgrades you don't need.

ActiveSync for mobile devices

All your devices are automatically kept up to date with your email, contacts and calendar using ActiveSync. FREE for iPhone, Windows Phone and Android.

Different devices, same experience

Your have the same experience when accessing Exchange from a mobile device, the desktop or web. Data is automatically synchronised and kept up to date.

Instant mailbox deployment

Whenever you make changes to your Hosted Exchange Account they happen instantly. There's no need to wait when you add or remove mailboxes or purchase upgrades.

Use your preferred email client

While Outlook is the industry standard, you still have the freedom to use email clients such as Thunderbird, Entourage or Mac Mail. Any client which uses POP or IMAP will work with Hosted Exchange.

Spam and virus protection

All Hosted Exchange comes with industry-leading Cisco IronPort email protection. IronPort works as a global network to sense threats to your email and to more accurately identify spam.

Australian data centre

Your data is located in Australian data centres helping you meet regulatory requirements. Other companies keep your data offshore, resulting in slower transfer speeds and more waiting.

24/7 Australian based customer support

When things don't quite go to plan, you can contact our friendly support team. Our support centre is managed around the clock so your business keeps running.
