- Linux

- PHP 5, MySQL 5, unlimited databases

Overview

Suitable for:

- Drupal
- ExpressionEngine
- Joomla
- Magento
- Moodle
- SilverStripe
- Wordpress
- Zencart

Supporting your business 24/7

Help is only a phone call or email away. Our world class support centre is open 24 hours a day, 365 days a year.

Enterprise hosting environment

Our clustered cloud environment offers full redundancy and protects against down time. Even during high traffic loads your website won't slow down.

Fast web delivery

We use multiple Tier 1 carriers to deliver your website. Sharing the load ensures visitors see your content as soon as possible.

Our network

Our Canberra-based network is one of the newest hosting networks in Australia. The CISCO powered network boasts dual gigabit links to each cabinet, and a fully redundant BGP blend of bandwidth including Agile, Australia's most trusted IP network, and PIPE Networks.

Data security

The security of your data is extremely important to us. On top of automated system updates, we employ a number of security applications across our servers, including mod_security rulesets, ingress and egress firewalls and PHPsuexec.
